LAGGOL

DEPARTMENT OF THE NAVY
OFFICER IN CHARGE
NAVAL FACILITIES ENGINEERING COMMAND CONTRACTS
CAMP LEJEUNE, NORTH CAROLINA 28542

IN REPLY REFER TO:

JAX/02/MLE/fao
N62470-81-C-3562
28 October 1982

From: Officer in Charge of Construction, Jacksonville, North Carolina Area
To: Base Maintenance Officer (Water Treatment Plant)

Subj: Contract N62470-81-C-3562, Repair and Paint Water Tanks, MCB, Camp
Lejeune, NC

Encl: (1) Cathodic Protection Settings

1. Enclosure (1), submitted by the Contractor under the subject contract,
is forwarded for your use in the maintenance and operation of the facility.

Air Station

For: Camp Lejune

Job # 4130

Jacksonville N.C.

Tank Size 350 m

Tank Location White Street

Rectifier # 9339 Output 60 Volts 28 Amps Manual Type
Year Model _____ Manufacturer Harco
Operating at _____ amps to the bowl _____ amps to the riser at _____ volts.
Tap settings of _____ C _____ F.

<u>Anodes</u>	<u>Strings</u>	<u>Type</u>	<u>Sections</u>	<u>Conditions</u>
Ring # 1	<u>8</u>	<u>CI</u>	<u>8</u>	<u>OK</u>
Ring # 2	<u>4</u>	<u>CI</u>	<u>1</u>	<u>OK</u>
Ring # 3	<u>1</u>	<u>CI</u>	<u>36</u>	<u>OK</u>
Ring # 4	_____	_____	_____	_____

SYSTEM CONDITION

All components were inspected and the following conditions exist:

Rectifiers: operating OK Rusty Case but operable
Wiring: _____
Suspension: OK
Other: System operating O.K.

POTENTIAL PROFILE

The following readings were obtained utilizing a high-impedance millivolt meter and a copper-copper sulphate reference electrode.

<u>Feet Off Bottom</u>	<u>Potential (mv)</u>	<u>Feet Off Bottom</u>	<u>Potential (mv)</u>	<u>Feet Off Bottom</u>	<u>Potential (mv)</u>
<u>0</u>	<u>1100</u>	<u>6</u>	<u>1500</u>	<u>15</u>	<u>1560</u>
<u>0</u>	<u>1300</u>	<u>9</u>	<u>1550</u>	<u>18</u>	<u>1580</u>
<u>3</u>	<u>1450</u>	<u>12</u>	<u>1560</u>	<u>21</u>	<u>1550</u>
				<u>24</u>	<u>1540</u>
				<u>27</u>	<u>1500</u>

30-1400

After inspection, the system was left operating at 1.5 amps to the bowl and .2 amps to the riser at 4 volts. Tap settings of A C 2 F 1100 potential.

To insure continuous cathodic protection, maintain between 1 amps and .2 amps to the bowl. Maintain between .1 amps and .3 amps to the riser on manual systems.

DO NOT ADJUST AUTOMATIC SYSTEMS WITH OUT PROPER INSTRUCTIONS.

The following readings were obtained utilizing a high-impedance millivolt meter and a copper-copper sulphate reference electrode.

<u>Feet Off Bottom</u>	<u>Potential (mv)</u>	<u>Feet Off Bottom</u>	<u>Potential (mv)</u>	<u>Feet Off Bottom</u>	<u>Potential (mv)</u>
<u>0</u>	<u>600</u>	<u>6</u>	<u>1550</u>	<u>15</u>	<u>1620</u>
<u>0</u>	<u>1450</u>	<u>9</u>	<u>1600</u>	<u>18</u>	<u>1700</u>
<u>3</u>	<u>1500</u>	<u>12</u>	<u>1600</u>	<u>21</u>	<u>1700</u>

After inspection, the system was left operating at 1.5 amps to the bowl and .3 amps to the riser at 3 volts. Tap settings of A C 3 F 1.0 potential.

To insure continuous cathodic protection, maintain between 1 amps and 2 amps to the bowl. Maintain between .2 amps and .5 amps to the riser on manual systems.

DO NOT ADJUST AUTOMATIC SYSTEMS WITH OUT PROPER INSTRUCTIONS.

K. R. Adams

Ring # 4				

SYSTEM CONDITION

All components were inspected and the following conditions exist:

Rectifiers: Bad Tap - Rectifier set higher than needed
Wiring: _____ Cannot be adjusted.
Suspension: OK
Other: _____

POTENTIAL PROFILE

The following readings were obtained utilizing a high-impedance millivolt meter and a copper-copper sulphate reference electrode.

Feet Off Bottom	Potential (mv)	Feet Off Bottom	Potential (mv)	Feet Off Bottom	Potential (mv)
<u>0</u>	<u>900</u>	<u>6</u>	<u>2000</u>	<u>15</u>	<u>2000</u>
<u>2</u>	<u>1700</u>	<u>9</u>	<u>2100</u>	<u>18</u>	<u>1900</u>
<u>3</u>	<u>1900</u>	<u>12</u>	<u>2000</u>	<u>21</u>	<u>1900</u>

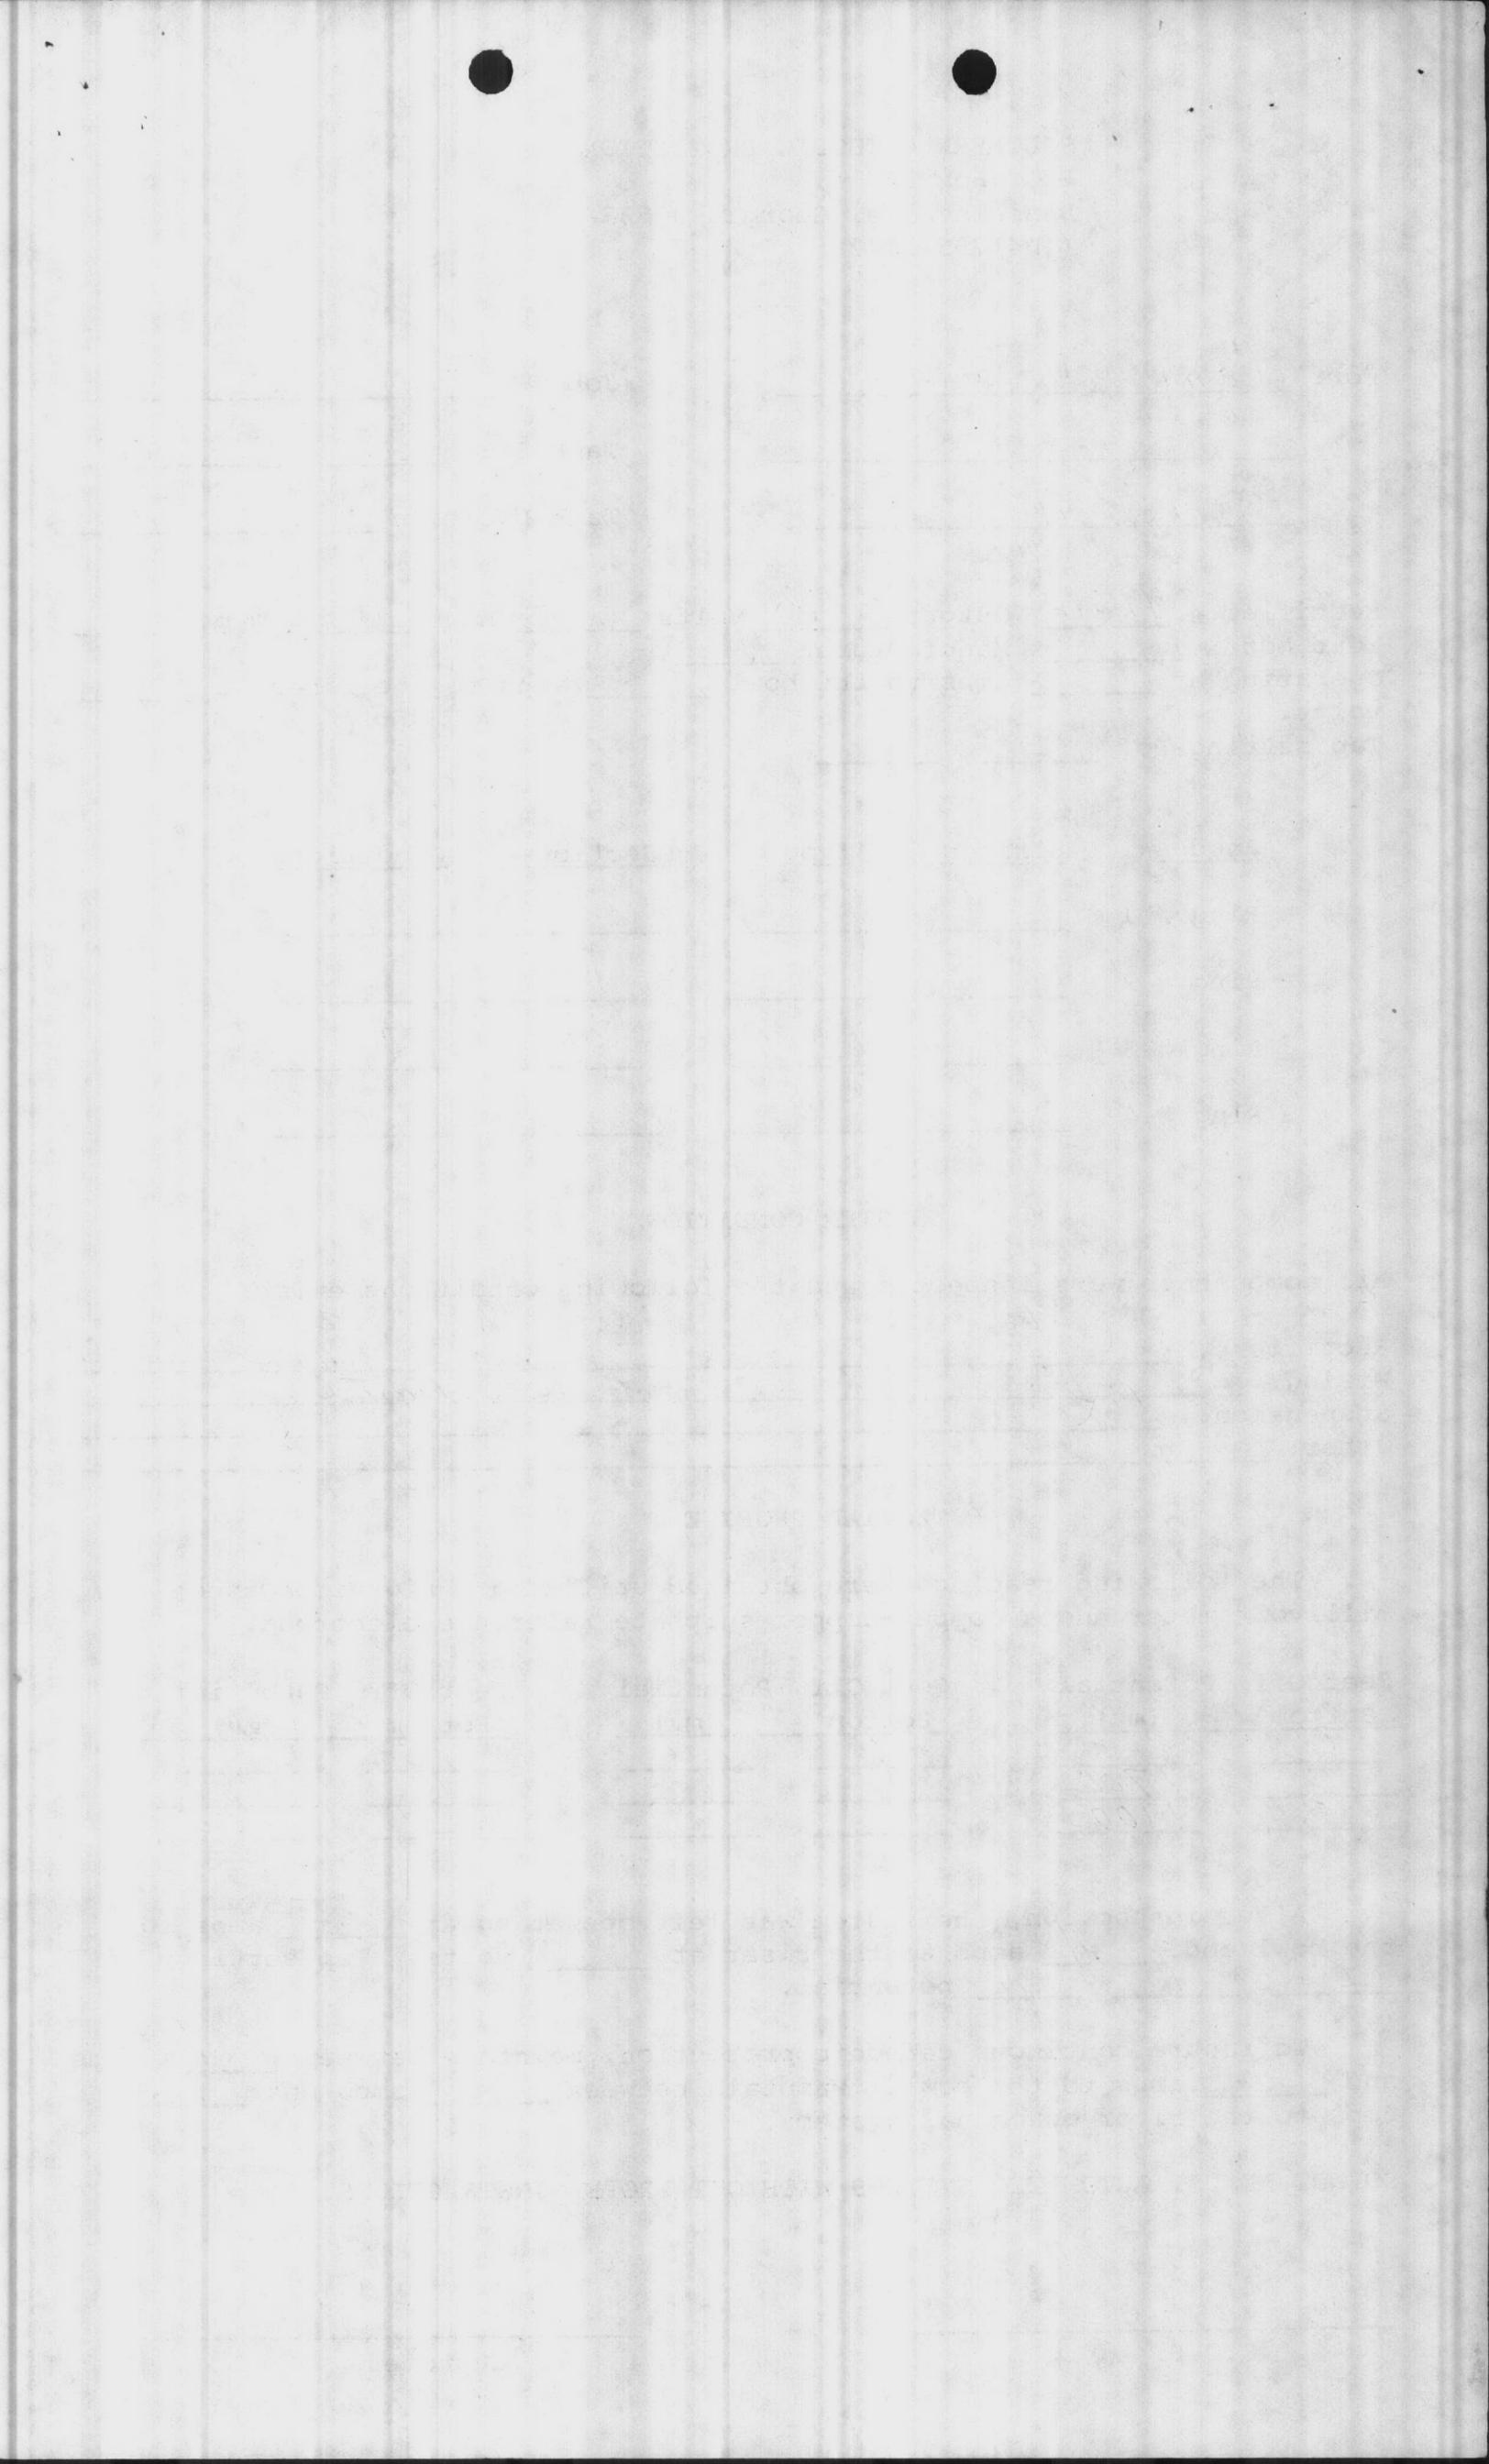

After inspection, the system was left operating at 1.5 amps to the bowl and 4 amps to the riser at 4 volts. Tap settings of B C 1 F 900 potential.

To insure continuous cathodic protection, maintain between 1 amps and 2 amps to the bowl. Maintain between .3 amps and .6 amps to the riser on manual systems.

DO NOT ADJUST AUTOMATIC SYSTEMS WITH OUT PROPER INSTRUCTIONS.
